INCIDENT MANAGEMENT SITUATION REPORT THURSDAY, AUGUST 20, 1998 - 0530 MDT NATIONAL PREPAREDNESS LEVEL II

CURRENT SITUATION:

Initial attack fire activity increased slightly yesterday due to lightning activity. Favorable weather again has allowed firefighters to make good progress toward containment objectives on large fires. The National Interagency Coordination Center processed orders for a caterer, aircraft, equipment, crews and miscellaneous overhead. Very high to extreme indices were reported in Texas, Minnesota, Michigan, Nevada, Utah, Idaho, Oregon, Washington, California, and Arizona.

EASTERN GREAT BASIN LARGE FIRES:

NORTH FORK COMPLEX, Salmon-Challis NF. A Type I Incident Management Team (Richer) is assigned. The fires are burning at 6,500-7,000 feet, approximately twenty miles west of Salmon. This complex is made up of the Bear Basin and Sheepeater fires. Crews continued to make excellent progress on the Bear Basin fire. Handline construction on the Sheepeater fire is also progressing well.

LOOPSEM CREEK, Boise NF. A Type I Incident Management Team (Monahan) is assigned. This fire is located two miles south of Yellow Pine. The fireline requires additional improvement to be 100% contained.

MUDDY CANYON, Utah State. This fire is located ten miles east of Grouse Creek. Private property and structures are threatened. Hand crews and a Type II helicopter have been ordered.

MAIN SALMON COMPLEX, Salmon-Challis NF. An Interagency Fire Use Management Team (O'Brien) is assigned. This complex is located 40 miles west northwest of Salmon. The complex consists of eleven fires burning in the Frank Church River of No Return Wilderness on the Salmon-Challis, Payette, Nez Perce and Bitterroot National Forests. Minimal activity occurred on all fires. Mostly sunny conditions and lighter winds were observed over the area. Bucket drops continued on Cayuse spot fires.

JACKASS, Salmon-Challis NF. This fire is 30 miles southwest of Salmon. Crews and bucket work effectively suppressed a spot fire. Very little activity occurred on the rest of the fire.

OUTLOOK:

Expect isolated dry thunderstorms to develop this afternoon across northern portions of the western U.S., from the Oregon Cascades eastward across central Idaho and into southwestern Montana. There is also a slight chance of dry thunderstorms in western Utah. Wet thunderstorms will occur in eastern Arizona and New Mexico. California, Nevada and the coast regions will be mostly clear.

High temperatures will be in the 70s along the coast and in the higher mountains. The inland valleys will see the 80s and 90s, and the deserts will range from the 90s to 105.

NR = NOT REPORTED UNK = UNKNOWN
